It was nice to speak with you yesterday. I am attaching the biological opinion on the Limetree Bay Terminal. Page 3 has the full species list considered. These are species that occur within the action area, which is defined to include all areas where the activity may take place or where indirect effects may be experienced. I have also sent a message to a contact in our HQ office to see if we can get any assistance there.

Let us know if you have any questions.

Have a nice weekend!

Hello,

I would like to recommend 10 am. I have also added my colleague Melissa Alvarez to this string. She conducted the ESA Section 7 consultation on the in-water work associated with the Limetree Bay facility.

I also suggest that you visit our [Section 7 Website](#) as it has a wealth of information on our Section 7 process, including the requirements for initiation of consultation. That should help with the conversation.

Cheers,

Jennifer

Thanks, Jennifer.

We are not available tomorrow but are available next Thursday, May 7th. Times could be 10:00, 11:00, 1:00 or 3:00pm. Please let us know which you prefer and we can set up a call.

As background, we are working on a response to public comments for an air permit in St. Croix, USVI. It is for a restart of a refinery that shut down in 2012. We consulted with the US Fish and Wildlife regarding the ESA but found that we also need to consult with Marine Fisheries. So this is the purpose of the call. The letter with the FWS is attached as fyi.

Thanks for your help.

Annamaria

(212) 637- 4016

p.s. Neha and I are air modelers. We may have Joe Siegel as our legal counsel working on the responses present as well so that we understand the process.

Hello Annamaria,

I would be happy to discuss your project with you and then likely put you in contact with someone from the Interagency Cooperation Branch within my office. I am the ESA Coral Recovery coordinator and do not conduct very many consultations, but I am familiar with the process and should be able to point you in the right direction. I am available tomorrow afternoon after 12:30 EDT. If that doesn't work, we will need to wait until next Thursday as I am in all-day meetings M-W.

Cheers,

Jennifer

Hello Jennifer,

We are writing to you to find information regarding an Endangered Species Act requirement. Neha Sareen and I are with the Environmental Protection Agency and we are working on an air permit project in St.Croix, US Virgin Islands. We received your name from the US Fish and Wildlife Service for that area, Jose Burgos-Cruz. Are you the correct contact?
